DIVINE GRACE COLLEGE OF ARTS, SCIENCE AND TECHNOLOGY (DGCAST) – GAROUA

MARKING GUIDE – FORM FOUR GEOGRAPHY

First Sequence Evaluation, School Year 2026-2027 • Duration: 1 hour • Marks: 20 • Facilitators: Mr KAMDEM Emmanuel – Mr TABIT B. Ajong

Paper marked: the Form 4 paper arranged by Mr TABIT (Section A: Verification of Resources; Section B: Verification of Competency). Marks printed on the paper: MCQ 10, structural question 8, Section B 5, presentation 2.

Please decide before marking: the printed marks add up to 25. Either mark out of 25 and convert to 20 (× 0.8), or count each MCQ for 0.5 mark (5 marks), which gives exactly 20. The grid below is written for **1 mark per MCQ (10 marks)**; with 0.5 mark per MCQ, halve the MCQ marks.

SECTION A (i): MULTIPLE CHOICE QUESTIONS (10 marks)

N°	Question	Correct answer	Marks
1	Soil is formed by physical, chemical and biological processes and is mainly composed of	B: mineral particles, organic matter, water and air	1
2	Erosion caused mainly by human activities, very fast	B: accelerated soil erosion	1
3	Cutting a slope into flat steps for cultivation	B: terracing	1
4	An ecosystem is best described as …	B: a natural area where living and non-living components interact	1
5	Organisms that make their own food from solar energy	B: producers (autotrophs)	1
6	Energy transferred from one trophic level to the next	C: 10 %	1
7	A depositional feature of hot deserts	B: barchans	1
8	A strategy against water scarcity in hot deserts	A: construction of water reservoirs (C “cultivating near oasis” is also arguable: decide before marking)	1
9	Relief units of Cameroon EXCEPT …	No option is a clear exception (all four are relief units): decide before marking, or give the mark to all candidates	1
10	Cameroon is located between latitudes …	No option is correct (the right answer, 2° N and 13° N, is not listed): give the mark to all candidates	1

No half-mark for a wrong answer; two letters marked for one question = 0.

SECTION A (ii): STRUCTURAL QUESTION (8 marks)

Table 1 (station X): total rainfall = 939 mm; temperature 26 to 33 °C; rain mainly from May to October.

N°	Expected answer	Marking	Marks
(a)(i)	Annual range of temperature = highest − lowest = 33 °C − 26 °C = **7 °C**.	Formula or method (highest − lowest): 1 mark. Correct values (33 and 26): 1 mark. Answer with unit (7 °C): 1 mark.	3
(a)(ii)	The wettest month is **August** (220 mm).	Correct month: 2 marks.	2
(b)	The biome is the **tropical wet and dry (savanna) biome**. Reasons (any two): hot all year (26 to 33 °C) with a small annual range (7 °C); one long rainy season (May to October) with about 939 mm of rain; a long dry season (November to April, with almost no rain in December to March).	Biome named: 1 mark. Each reason with a figure from the table: 1 mark (up to 2).	3

SECTION B: VERIFICATION OF COMPETENCY (5 marks)

Situation: Mrs Nkwetecha’s yields have dropped and her farm on a hill slope has lost much soil carried by wind and torrential rain.

Task	Expected answer	Marking	Marks
1	The problem is **soil erosion** (loss of the soil by wind and water on her farm), which reduces her yields (loss of soil fertility).	Soil erosion named: 1 mark.	1
2	Any two causes: farming on a steep slope without protection (ploughing up and down); clearing the plant cover (deforestation, bush fires); heavy rain and strong winds on bare soil; continuous cultivation without rest or manure.	1 mark per cause, up to 2.	2
3	Any two measures: terracing; contour ploughing or strip cultivation; planting trees, windbreaks and cover crops; mulching; crop rotation and manure.	1 mark per measure, up to 2.	2

PRESENTATION (2 marks)

Criterion	Marking	Marks
Neat paper, legible handwriting, answers written in the spaces provided	1 mark if clean and legible; ½ mark if partly	1
Correct spelling and complete sentences	1 mark if few errors; ½ mark if many	1

Total printed: 10 + 8 + 5 + 2 = 25 marks (convert to 20 by × 0.8), or 5 + 8 + 5 + 2 = 20 marks with 0.5 mark per MCQ.
